

# Discovery Streaming - Bookmark with QuickList and My Content

## QuickList

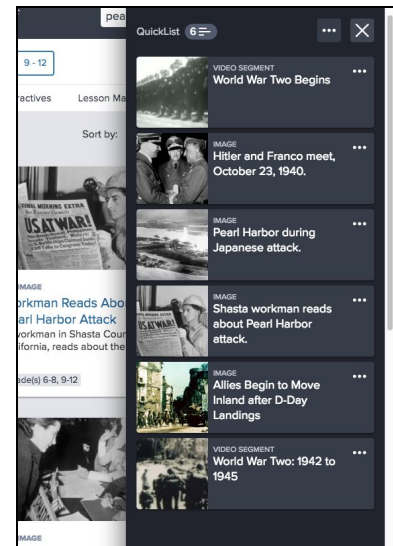

**QuickList** allows you to add resources to a list which is always visible at the bottom of your screen. **QuickList** is helpful for curating resources as you sort search results to compare or review later.

Resources added to the **QuickList** will remain until they are removed, even if you log out of Discovery Streaming.

To add a video, song, image, exploration, or any other resource to your **QuickList**, click the “+” on the resource.

To view and use the items in your **QuickList**, click on the **QuickList** button in the top, right area of your screen to expand (click the X to collapse).

To remove an item from the **QuickList**, click the “X” on the resource, or use the **List Options** to remove and complete other actions.

## My Content

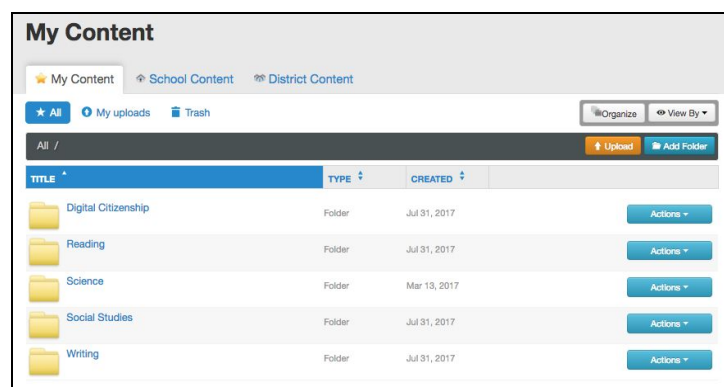

**My Content** allows you to collect, organize, share, and retrieve your favorite Discovery Streaming videos, images, songs, boards, and more in an organized filing structure.

Located in the black navigation bar on the left side of the Discovery Streaming screen, **My Content** is accessible from anywhere on the site.

**My Content** works just like the folder structure on your computer. You can create sub-folders to create hierarchies within content, grade levels, or courses. You can also choose to share resources with your school and your district.

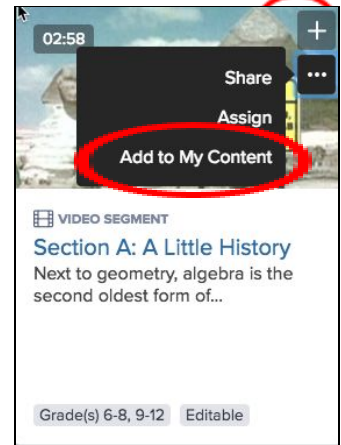

Adding resources to **My Content** does not initiate the playing or downloading of a resource. The purpose of **My**

**Content** is to bookmark the resource for easy retrieval. All files and projects within **My Content** are stored on the Discovery Education servers.

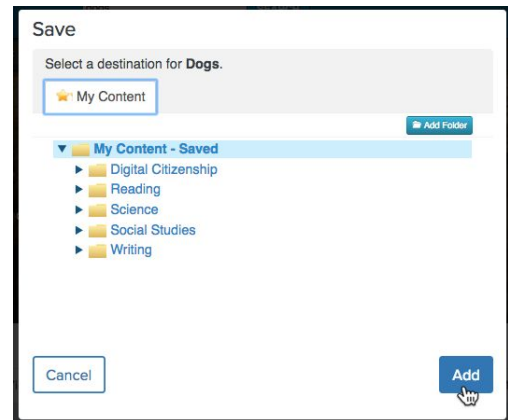

To add resources to **My Content**:

1. Locate a resource that you wish to add to **My Content**.
  - a. On a search results page, select the three dots (...) on a resource and choose **Add to My Content**
  - b. On the video player page, click **My Content** under the video player

2. In the window that appears, add the resource to the **My Content** default folder, select a different folder, or add it to a new folder.
3. If you select **Add to New Folder**, follow the prompts to enter a folder name and folder location – remember, **My Content** allows you to create folders within other folders.
4. Click **Add**, and the window will display a confirmation message.

5. To access your content, click on the **My Content** link on the dark grey navigation bar at the top of any Discovery Streaming page.

Once you have added media resources to **My Content**, you can use the pull-down menu or drag-and-drop to copy, move, edit, preview, and delete them at any time. You can also sort your resources by type, name, creation date, subject, or grade by clicking on the appropriate column header.
